

foresight & innovation

BOOST INNOVATION IN YOUR BUSINESS

You and your team deserve to be more
than just good at what you do!

Incite works with business leaders to make their business
exceptional

Craig Rispin develops foresight, innovation and thought
leadership

Together we will show you

- How business leaders can foster a culture of innovation
- What's the theory?
- What's the reality?

In this quarterly program

- We will run half day workshops with a small team of like-minded business leaders
- develop YOUR vision and strategic foresight
- boost essential innovation and thought leadership skills

In addition, there will be one on one sessions specifically
designed to develop your individual strategy – for you or your
business.

This program is not about scratching the surface – it's about
changing the way you view your business, your team and
your personal approach.

Tired of just theory based programs? You will enjoy the
change as you receive hands-on mentoring and full support
from Craig Rispin and the Incite Management Team.
